

SUN Yi Xiu

ysunem@connect.ust.hk | +86 15611677976 | yixiusun.github.io

EDUCATION

The Hong Kong University of Science and Technology (HKUST) **Hong Kong, China**
Candidate for a Bachelor of Science degree in Data Science and Technology Sept 2024-present

- Major GPA 4.136/4.3; Overall GPA: 3.930/4.3
- Relevant Coursework: Machine Learning (A); OOP and Data Structures (A+), Design and Analysis of Algorithms (A+); Probability (A+), Applied Statistics (A+), Analysis (A), Discrete Mathematics (A+), Multivariable Calculus (A+), Linear and Abstract Algebra (A+), Calculus (A+); Internet Computing (A-)

RESEARCH EXPERIENCE

Research on Real-time and Action-Conditioned Video Generation (HKUST) **Hong Kong, China**
Feb 2026-May 2026

- Reproduced CausVid (an autoregressive video generation model) and applied its distillation strategy to an action-conditioned video generation pipeline.
- Surveyed methods for causal-attention-based and action-conditioned video generation.

Research on Brain Decoding (HKUST) **Hong Kong, China**
Sept 2025-Jan 2026

- Contributed to a project by performing data visualization, retrieving similar images, and writing scripts for aligned data extraction.
- Reviewed and reproduced related work on EEG foundation models and EEG/fMRI-to-image models (e.g. CBraMod, MindEye2 and ATM) and conducted ablation studies to analyze model design.

PROJECTS

HackTheEast Hackathon 2026 **Hong Kong, China**
Feb 2026

- Built a web platform that presents research papers in a social-media-style feed.
- Deployed the system on AWS and implemented real-time paper retrieval through the arXiv API.
- Integrated Gemini API to generate aligned summaries and images for newly loaded papers.

Internet Computing Coursework: Online Multiplayer Game ([Webpage](#)) **Hong Kong, China**
Nov 2025

- Collaborated in a 3-person team to develop a two-player online gaming website.
- Developed the core game logic, including physical collisions and spring simulations, while also implementing the majority of the stylized animations.
- Designed a gameplay mechanic where players drag tethered balls to strike targets and earn points.

2025 Hong Kong Inter-University GenAI Hackathon for Sustainable Development Goals
Hong Kong, China
Finalist Sept 2025

- Led a 4-person team and handled the core technical development, including full-stack implementation, model integration, and database design.
- Designed and developed a locally hosted web application for detecting food contraindications based on user input and images, advancing dietary safety.
- Advanced to the Final Round.

AWARDS

University Awards:

Chern Class Scholarship (25 Fall) (for students with mathematical excellence)

University's Scholarship Scheme for Continuing Undergraduate Students (2025/26)

Dean's List (24 Fall, 25 Spring, 25 Fall)

Informatic Olympiad:

Asia-Pacific Informatics Olympiad (APIO) (online) — Silver Medal (May 2022)

National Olympiad in Informatics in Provinces (NOIP) — First Prize (Dec 2021)

SKILLS

Language: Mandarin (native), English (fluent)

Programming: Python (PyTorch, NumPy, Pandas, etc.), C++, JavaScript

Tools: Git, LaTeX, Linux
